Estero is an Education New Zealand Recognized Agency that aims at making higher education accessible; along with building student capabilities as future employees by connecting students and working professionals with the right program in the right institution, overseas. Founded in December 2011, the organisation is led by the experience of an entrepreneur who himself started as an international student and thereafter was actively involved in the overseas education sector.

The organization works very closely with stakeholders from the education sector to promote high-quality educational institutions across the globe. Estero partners with Universities, Institutes of Technologies, Polytechnics and Schools across the world to identify the highest value opportunities for students.

# WHAT 'HIGH-VALUE' MEANS FOR INTERNATIONAL EDUCATION

New Zealand government has opened a consultation regarding the much-anticipated topic - What 'high-value' means for international education; in order to provide clarity on market direction for the sector. The consultation process closes on September 3rd and would pave the way forward for future policies vital to international students such as - post-study work rights and opening of the borders to international students.

## AUSTRALIA POSITIVE ABOUT OPENING BORDERS TO SINGAPORE BY END OF 2021

In spite of the current state of the Transtasman bubble, Australia has said it is determined to open its borders to Singapore by the end of the year. In theory this could lead to New Zealand being opened up for international travellers again via the back door. As it stands, once inside Australia the "safe travel zone" agreement would allow travellers from Singapore to visit New Zealand quarantine free after 14 days. [Read More](#)

## **INZ SUSPENDS OFFSHORE TEMPORARY VISA APPLICATIONS TILL FEB 2022**

New Zealand News

Immigration New Zealand has suspended visa processing for most individuals who are outside New Zealand unless they meet the strict border exception criteria or are currently in a COVID-19 quarantine-free travel zone. The Government has extended the suspension to 6 February 2022. The suspension can be lifted if the border restrictions change. Immigration New Zealand will continue to process visas for those who are not subject to the COVID-19 border restrictions, and for those who have been granted a border exception.

# ESTERO OUTREACH PROGRAM

Estero News

Estero is currently working with multiple high schools across India to create awareness about study opportunities (UG) in New Zealand. Covid19 has disrupted the academic plans of high school students due to the delayed year 12 results. NZ universities have played a crucial role in supporting Estero with this campaign. They interacted with the students & their parents, talking about various growth areas alongside the opportunity to start their undergraduate degree based on their predicted scores from the school.

## CONSTRUCTION MANAGEMENT IN NEW ZEALAND

### Industry Focus

Construction management is a sub-specialisation of Civil Engineering that prepares the building and construction managers to plan, control and co-ordinate civil engineering or building projects, and the resources and people involved. Construction managers are supposed to be skilled at building methods and materials, interpreting drawings & architectural plans, understanding building standards, quantitative knowledge, understanding quality control systems, administrative and business skills. Employment for construction managers can be based on their degrees in Civil Engineering, Architecture, Building Sciences and Quantity surveying qualifications. There is a high demand for construction managers in New Zealand as they come under the skills shortage list. Construction is the fifth largest sector in New Zealand's economy, employing just over a quarter of a million people. Employment in construction has grown consistently since 2012. This has been a result of a severe shortage of residential housing and heavy government investment in infrastructure to modernise existing assets. Construction is one of the highest paying sectors in New Zealand with individuals earning between \$80K-\$170K per year. Great career-building opportunities and good pay make construction management a promising career in New Zealand. You can study UG & PG degrees in Construction related subjects at institutions like - the University of Auckland, AUT University, Massey University, Victoria University of Wellington and a number of Institutes of Technology in New Zealand.
